

THE IMPROVING EDGE | David Sandoval, President, Improving Mexico

INTRO SCRIPT

Welcome to **The Improving Edge**. This is where we talk about how AI and technology actually show up in real organizations; what works, what doesn't, and what we're learning along the way. I'll be sharing conversations with people doing the work, turning innovation into outcomes.

Season 1, Episode 10

Nearshore/Offshore and AI: Rethinking How and Where Work Gets Done

Episode Overview

AI is reshaping distributed delivery models in ways most organizations haven't fully reckoned with. David Sandoval leads Improving Mexico and has spent 14 years building nearshore teams. We'll explore whether AI is reducing the need for distributed teams or making them more important, how collaboration and knowledge-sharing across regions is changing, and what separates teams truly leveraging AI from those just experimenting with it.

Key Discussion Topics

#	TOPIC	FOCUS
1	AI and Distributed Delivery	How AI is changing the way organizations think about nearshore and offshore models.
2	Productivity and Output	What the real AI productivity impact looks like across locations — beyond the hype.
3	Collaboration Across Regions	How AI is affecting collaboration between onshore and nearshore/offshore teams.
4	Knowledge and Alignment	Whether AI closes communication gaps or exposes deeper alignment issues.
5	Quality and Delivery Risks	New risks that emerge when AI is introduced across distributed teams.
6	Talent and Skills	How AI is shifting skills and expectations for nearshore/offshore talent.
7	What's Ahead	Does AI flatten global delivery — or make strong delivery partners more critical?

Prompting Questions

1. On AI and Delivery Models

"How is AI changing the way organizations think about nearshore and offshore delivery models?"

2. On Whether Distributed Teams Still Matter

"Is AI reducing the need for distributed teams — or is it actually making them more important?"

3. On Where Work Gets Done

"How should leaders rethink what work gets done where in an AI-enabled delivery model?"

4. On Real Impact Today

"Where are you seeing the biggest real impact of AI in nearshore/offshore engagements today?"

5. On Productivity

"There's a lot of hype around productivity. How is AI affecting team output across locations?"

6. On Personal Experience

"What has been your personal experience with using AI in your work? What have been the highlights and challenges?"

7. On What Organizations Get Wrong

"What are organizations getting wrong about AI's impact on distributed delivery?"

8. On Collaboration

"How does AI influence collaboration between onshore and nearshore/offshore teams — and how has it impacted your team specifically?"

9. On Communication and Alignment

"Does AI help close communication gaps, or does it expose deeper alignment issues?"

10. On Knowledge Sharing

"How does AI change the way teams share knowledge and context across regions — and are teams currently making enough use of this?"

11. On Quality and Risk

"What new quality or delivery risks show up when AI is introduced across distributed teams?"

12. On Standards

"How do you ensure consistency and standards when different teams are using AI in different ways?"

13. On Talent

"How is AI shifting the skills and expectations for nearshore and offshore talent?"

14. On Who's Actually Winning

"What separates teams that are truly leveraging AI effectively from those just experimenting with it?"

15. On Trust

"How do you build trust in AI-generated work across globally distributed teams?"

16. On the Future

"Looking ahead, does AI flatten global delivery — or does it make strong delivery partners even more critical?"

17. Wrap-Up

"What is the main takeaway you'd like the listeners to have after this discussion?"

REMEMBER: Keep it conversational (60% guest / 40% host) • Share personal stories • Have fun!
