

Coaching Session

Brian Schultz & Sean Jackson

Monday, July 6, 2026 | 11:00 AM – 12:00 PM CDT | Improving Enterprises, Plano

Who's in the Room

Brian Schultz

- **Title:** CEO, LOOK Cinemas | Chairman & Co-Founder, EasyBotChat
- **Background:** Pioneer of the dine-in theater concept. Founded Studio Movie Grill (the original), then built LOOK Cinemas.
- **LOOK Cinemas:** 10 theaters, ~100 screens across TX, CA, FL, AZ, and NY. 7 premium dine-in locations. ~1,000 employees.
- **EasyBotChat:** Co-founded with Sean Jackson. LOOK Cinemas is the flagship case study. Brian is the domain credibility and operator voice; Sean is the tech builder.
- **Recent:** Spoke at CinemaCon 2026 (April) on "Practical AI for Streamlined Theater Operations." Significant visibility in the exhibition industry.

Sean Jackson

- **Title:** Co-Founder, EasyBotChat
 - **Background:** Decades building tech companies and AI solutions. The builder side of the EasyBot partnership.
 - **Based:** Dallas TX (6116 N. Central Expressway, Suite 1440)
 - **Role:** Platform, product, and technical delivery. Brian is the operator/credibility; Sean is the engine.
-

EasyBotChat — What It Is

AI-powered staff assistant for multi-location operations. Employees get instant answers to operational questions via mobile or NFC tags placed at key locations in the building. Trained on company SOPs, policies, and training materials.

Key differentiators:

- Flat monthly fee — no per-user or per-location charges (scales cleanly)
- Turnkey setup, live in one week
- Analytics dashboard showing what teams are actually asking (surfaces training gaps)
- Built for hospitality and retail, now expanding into broader markets

LOOK Cinemas results (their own case study): Cut training time, reduced manager repetitive inquiries, improved consistency across all locations, reduced turnover signal.

Just announced: Strategic partnership with Cinema Hero Solutions (CinemaCon 2026) — named as preferred deployment partner for cinema operators. Cinema Hero has 50+ years combined experience in POS deployments and theater operations consulting. This is EasyBot's first major industry distribution channel.

The Coaching Context

Brian is running two companies simultaneously. The coaching relationship is the core of this meeting — David provides leadership counsel and strategic sounding board.

Dual-hat leadership

Brian is CEO of LOOK (an operating company with ~1,000 employees) while also building EasyBot as a startup from the ground up. These are two very different leadership modes. The CinemaCon moment gave EasyBot public credibility and the Cinema Hero partnership gives them distribution. The pressure to decide how much of himself to put into each company is real.

EasyBot growth stage

They've got a proven case study (LOOK), a major partnership (Cinema Hero), and fresh press coverage. The next question is go-to-market at scale: Do they stay in cinema or use it as the beachhead for broader hospitality/retail? Who sells? How does Sean's technical capacity hold up as deployments grow?

Team and talent

Both companies have people challenges. LOOK runs ~1,000 employees in high-turnover hospitality. EasyBot is a small startup likely needing to hire as they scale. This is a recurring leadership challenge Brian lives every day.

Suggested Questions to Drive the Session

1. The Cinema Hero partnership just launched at CinemaCon. What's it opened up in the first 90 days? Is the deal flow where you expected?
 2. EasyBot has LOOK as the proof case and cinema as the beachhead. Is cinema the whole market or the doorway to something bigger? What does the horizon look like?
 3. What does Sean most need from you right now — and what are you finding hardest to give him while also running LOOK?
 4. Where is the org most fragile at LOOK right now? The AI is embedded, training is tighter, turnover is improving. What's the next operational frontier?
 5. What decision are you sitting on that you haven't made yet?
-

Watch For

- **EasyBot expanding beyond hospitality:** Improving has capabilities in AI platform engineering, data, and application development. Don't sell in the room, but listen for the opening.
- **LOOK hitting operational scale challenges:** AI strategy, workforce analytics, and platform modernization are all Improving territory.
- **Brian struggling with the dual-CEO split:** That's a coaching moment, not a sales moment. Stay in it with him.
- **Sean's role in the conversation:** He's likely there for strategic input on product/market direction. His questions will tell you where EasyBot is actually stuck.
