Improving Edge Short-Form Strategy: Monday Studio Session

Studio: MarketScale, 901 Main St, Dallas · **Main session:** Episode 17 with Amber Robinson, 12:00-2:00 PM CT · **Covers:** the extra studio time for short-form clips

---

Competitive Landscape

Podcast	Owner	Short-form reality	Traction
Me, Myself, and AI	**MIT SMR + BCG**	Audio-first; YouTube mirror only	~100-900 views
AI in Business	**Emerj (Dan Faggella)**	Audio-only	effectively zero
The So What / Imagine This	**BCG**	Systematic podcast-to-Shorts clipping, brand-voice format	~200-1.5K views
McKinsey podcasts	**McKinsey**	Active Shorts program, expert/guest-first, no named host	~300-2K views
Smart Talks	**IBM + iHeart (Malcolm Gladwell)**	4-10 min highlight reels on corporate channel, not sub-60s Shorts	~300-8K views
The Press Room	**Deloitte**	Podcast exists, no meaningful short-form video strategy	sparse
Built for Change	**Accenture**	Shorts are event coverage, not thought leadership	sparse, one outlier at 47K
Thoughtworks Technology Podcast	**Thoughtworks**	Weekly practitioner show; shorts are technical, serve engineers not executives	~200-6K views
EntreLeadership	**Ramsey Solutions**	Host-first, hook-titled, single-idea Shorts at high cadence	1K-44K views per clip
Craig Groeschel Leadership	**Life.Church**	Same playbook as EntreLeadership	1K-5K views per clip

The gap: brand-voice clips underperform across the consultancy set, the leadership hosts prove the format works at 10-100x the traction, and no one puts a named operator with AI delivery credibility on camera. That seat is open.

David is the only voice in this set who runs a regional P&L;, delivers AI work to enterprise clients daily, teaches executives AI in paid workshops, and brings a culture-informed executive voice without being preachy about it. The big firms can't put a named accountable operator on camera; the leadership clip machines can't talk about AI with any depth; the AI shows have no face. Short-form lets him own the intersection: the operator's 60 seconds on AI in real organizations.

Block A: AI in Real Organizations (record first, while Episode 17 context is hot)

#	Title	Hook (first 5 seconds)	Length
A1	**Shadow AI is already in your building**	"Your employees are already using AI at work. The only question is whether you know it."	60s
A2	**The best AI policy is the one people actually follow**	"Most AI usage policies fail before anyone reads them."	60s
A3	**The billable hour just met its match**	"Work that billed ten hours now takes one. Somebody's invoice is about to get very uncomfortable."	90s
A4	**Who owns what AI makes?**	"If AI wrote it, who owns it? If AI got it wrong, who pays for it?"	30-60s

Block B: Leadership in the AI Era (mid-energy, conversational set)

#	Title	Hook (first 5 seconds)	Length
B1	**AI isn't in the loop. You are.**	"Everyone says 'human in the loop.' I think you've got it backwards."	60s
B2	**Leading agents is leadership practice**	"Want to find out if you're a micromanager? Try managing ten AI agents."	60s
B3	**Culture eats your AI strategy**	"I've never seen an AI project fail because of the model. I've seen plenty fail because of the culture."	60-90s
B4	**Relationships are the currency of life**	"Here's what AI will never take from you, and why it makes your relationships worth more, not less."	60s

Block C: The Operator POV (authority register, close the session)

#	Title	Hook (first 5 seconds)	Length
C1	**What $300M of digital services work taught us about AI**	"Improving does about $300 million a year in this work. Here's what actually separates the AI projects that land from the ones that don't."	90s
C2	**What client companies are actually doing with AI right now**	"Here's what AI adoption actually looks like inside real companies. Not the conference-keynote version."	60s
C3	**AI won't replace your paralegal. Here's why.**	"The jobs everyone says AI kills first? I'm watching it make them more valuable."	60s
C4	**Three questions I ask every executive before an AI workshop**	"Before I let a leadership team spend a dollar on AI, I ask them three questions."	90s

Optional Two-Shot

If Amber can stay ten minutes: **"A Lawyer's Honest Take on AI in 60 Seconds"** - one rapid-fire question ("What should every exec do in the first 90 days?"). Guest clips outperform host-only clips for reach and she's already mic'd.

Studio Plan

1. Optional Amber two-shot first, 5-10 min
2. Block A while Episode 17 context is hot, ~25 min with retakes
3. Micro-break, then Block B, ~25 min
4. Block C in the authority register, ~25 min

If time compresses, priority order: A3, C4, B3, A1.

Record-longer, cut-shorter: deliver every clip as a 90-120 second take with a clean hook at the top, recorded standalone twice so the edit has options for the first three seconds.

Evergreen vs timely: B1-B4, C1, C3, C4 stay in rotation all year. A1-A4 and C2 tie to Episode 17's release week; confirm timing with Janine before referencing the episode on camera.

Production asks (Kristin): horizontal and vertical framing per clip, clean room tone between takes, and a mid-take still per clip for LinkedIn thumbnails. Confirm with Janine whether clips route through the standard approval pipeline before anything posts.

Voice reminders: direct and warm, y'all where natural, no teleprompter, one dry joke per clip maximum. No hype. The frame is always "here's what we see doing the work," never "here's what you should fear."
